REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest the claimed invention as a whole including a controller programmed to determine a target hydraulic pressure by selecting a larger one of a first hydraulic pressure required to allow rotation of the control shaft to vary the compression ratio of the internal combustion engine such that knocking does not occur in the engine and a second hydraulic pressure required for holding the control shaft at a rotational position to maintain the compression ration of the internal combustion engine, or the method of determining a predetermined hydraulic pressure to be supplied to the hydraulic actuator on the basis of the detected operating conditions of the internal combustion engine, detecting a hydraulic pressure within the hydraulic passage, and controlling the hydraulic pressure supplied to the hydraulic actuator to the predetermined hydraulic pressure on the basis of the detected hydraulic pressure within the hydraulic passage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marguerite J. McMahon whose telephone number is 703-308-1956. The examiner can normally be reached on flex.
